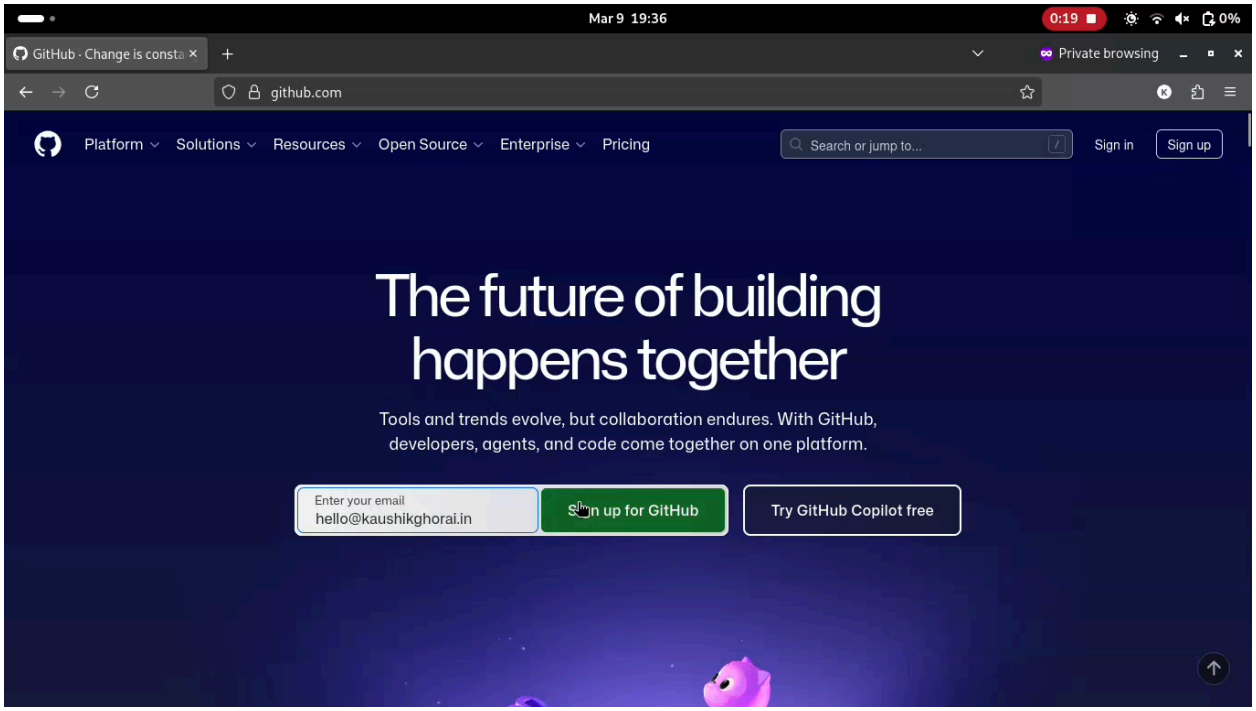
WT Assignment 1

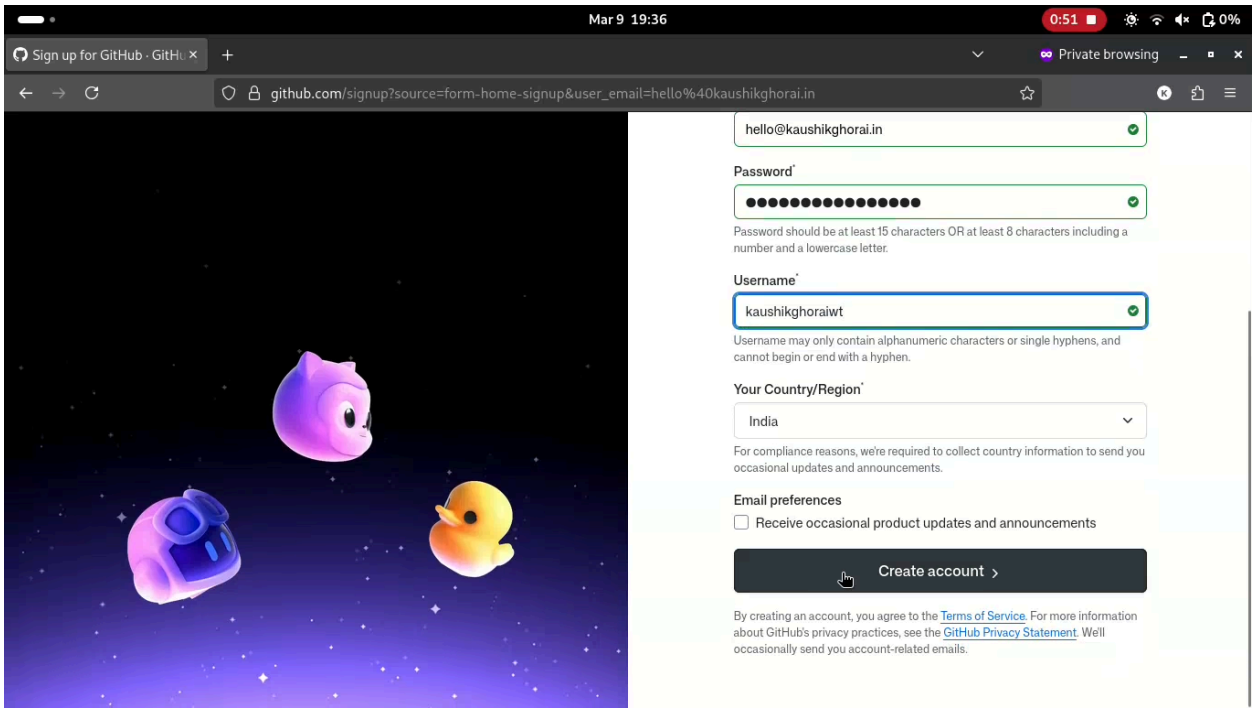
Kaushik Ghorai 2402031000022

Steps to create github repository

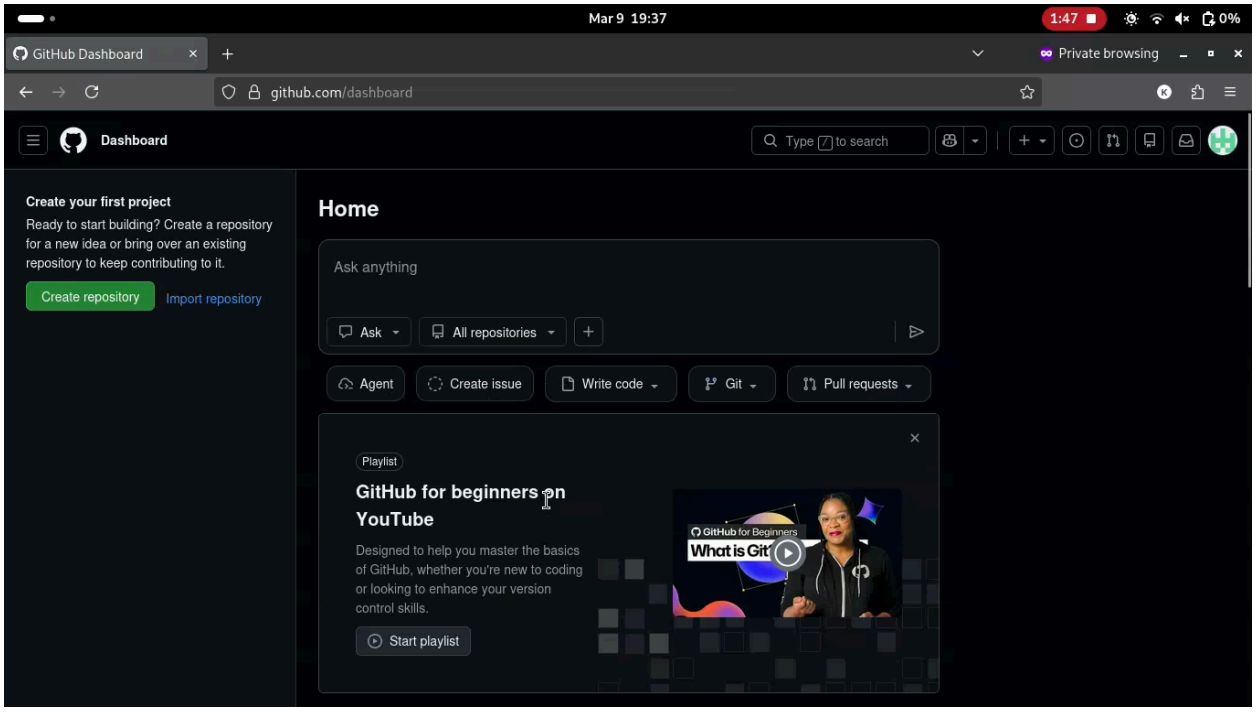
Step 1: open in github.com write email address and click signin.



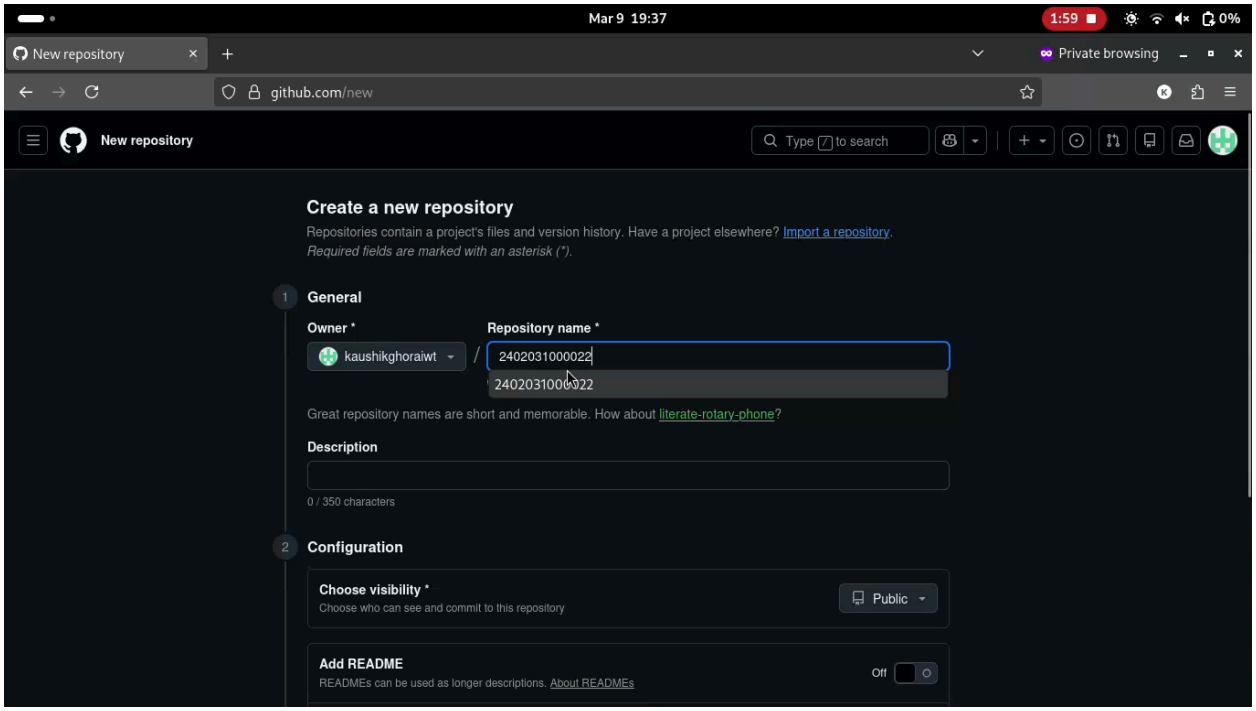
Step 2: Write down password and username.

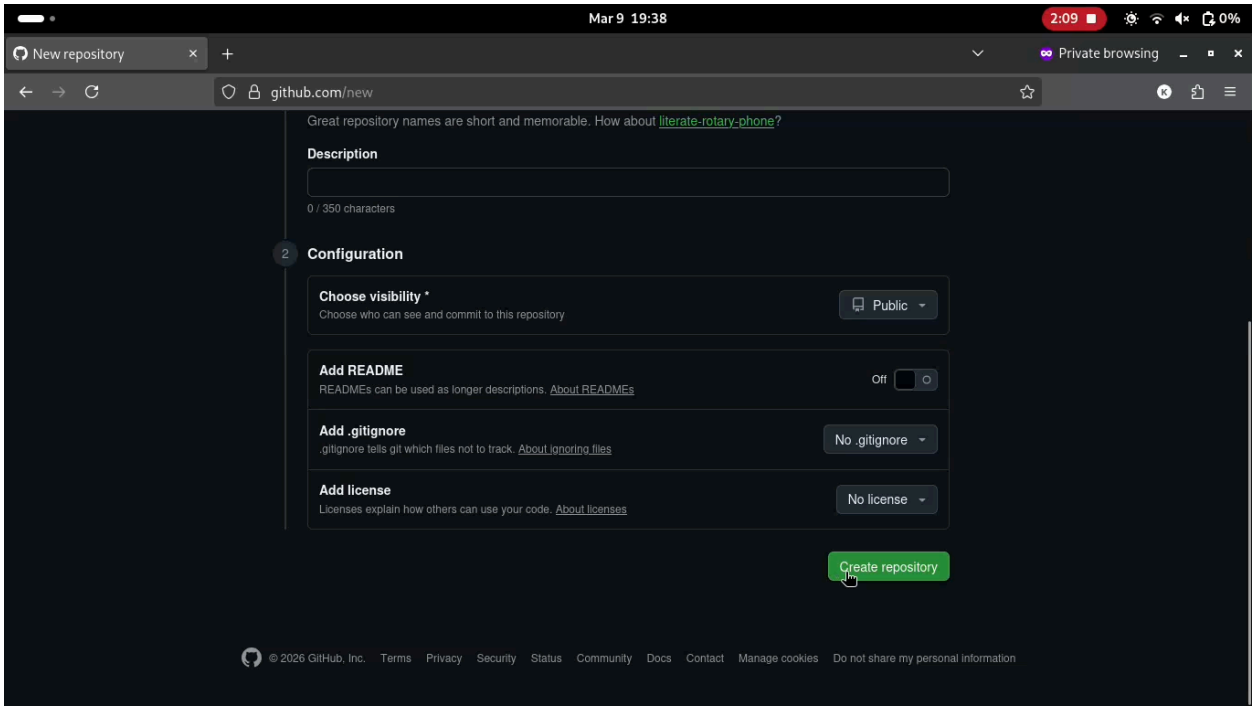


Step 3: Click on Create repository.

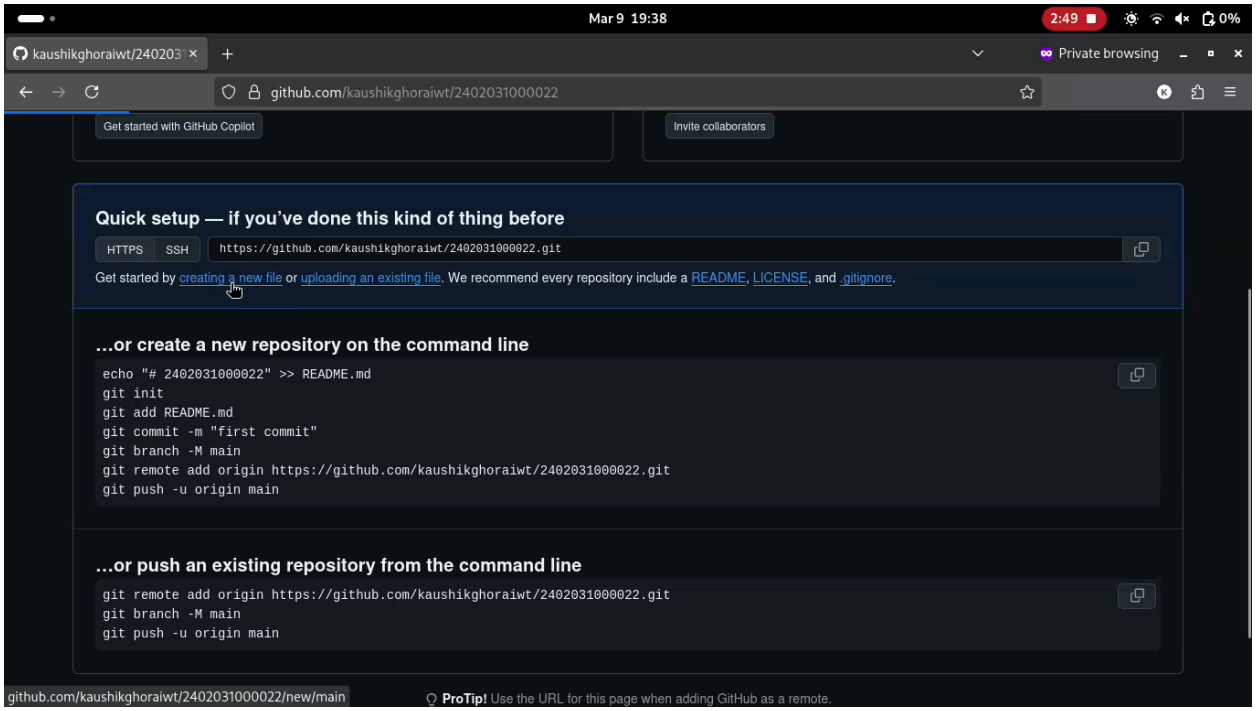


Step 4: write enrollment number as a repository name and scroll down then click on create repository.

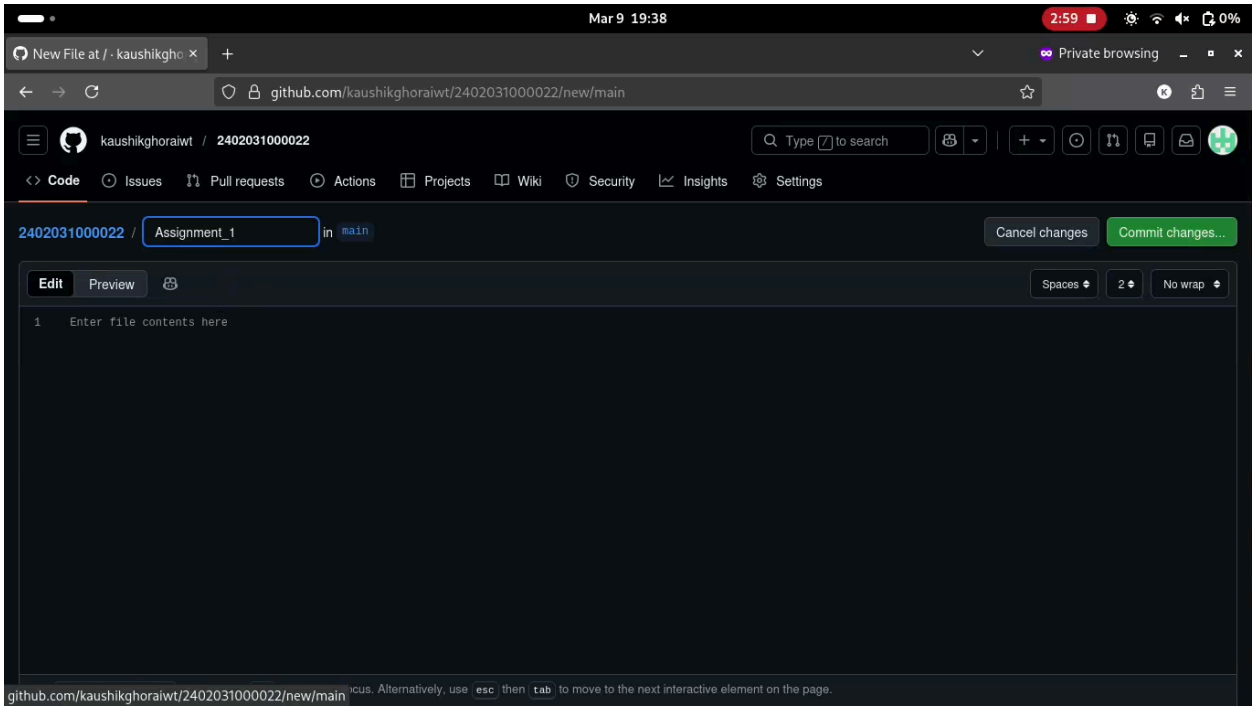




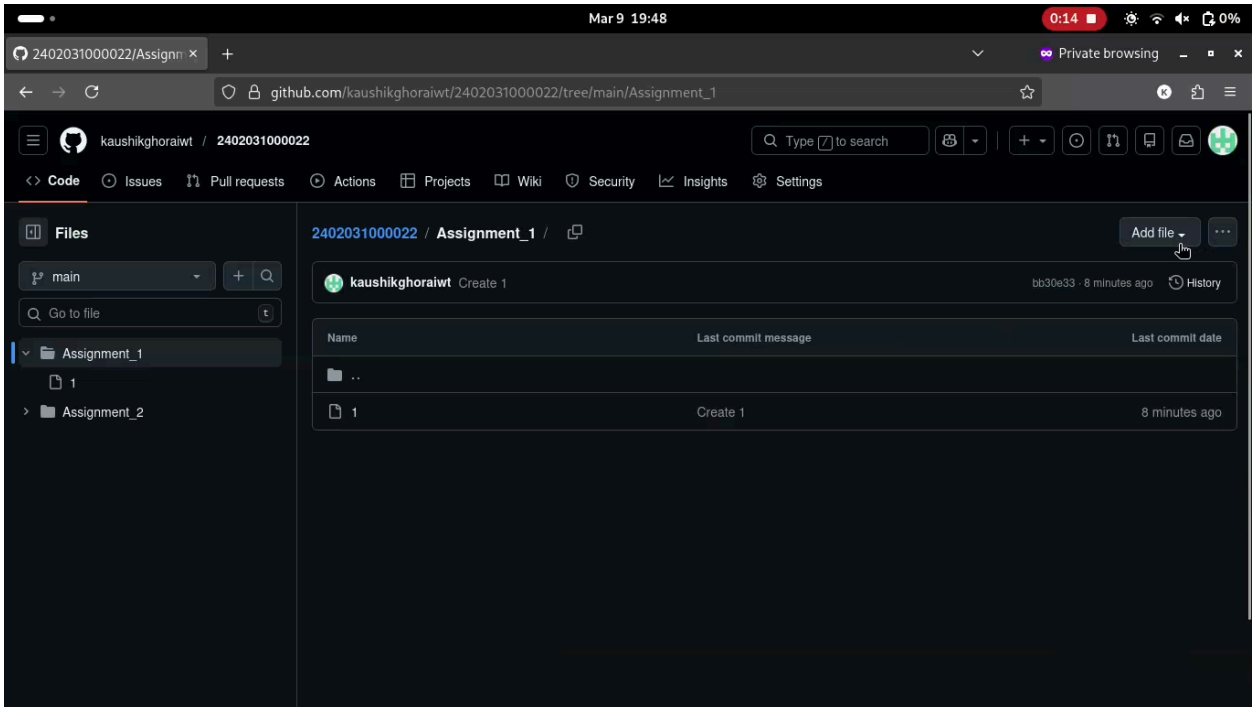
Step 5: Click on create a new file.



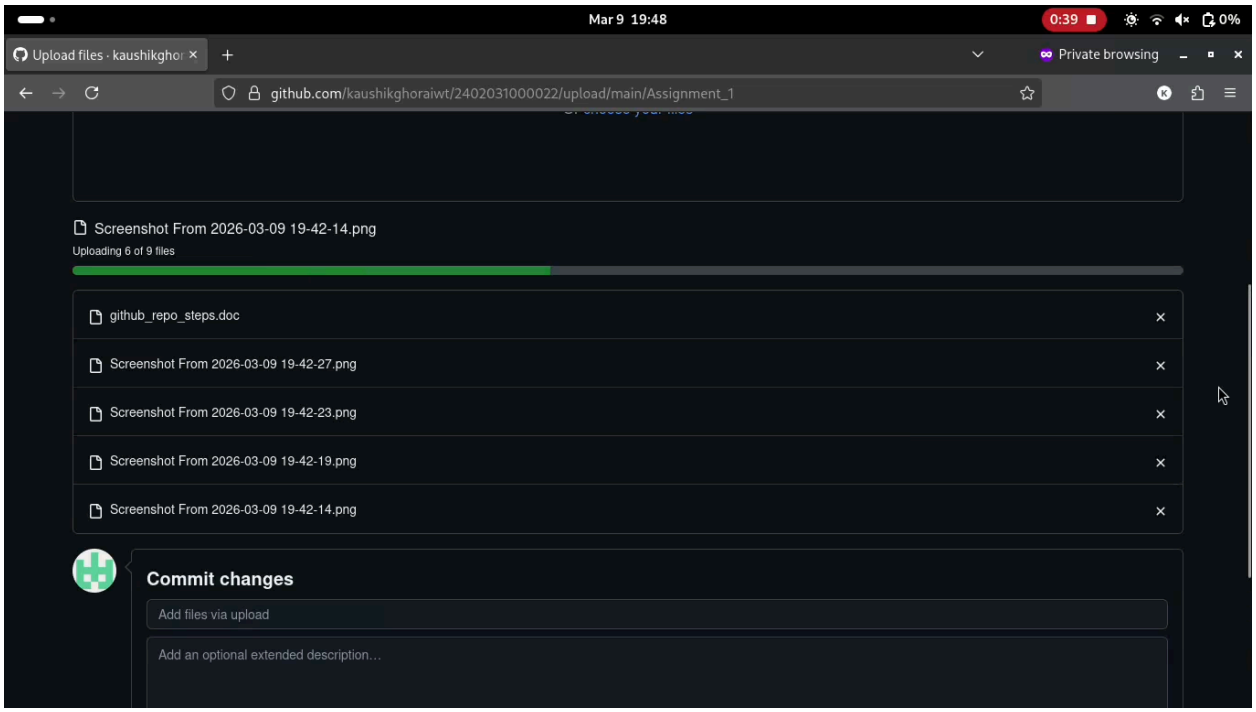
Step 6: In name your file input box write “Assignment_1/” and again “1”. (“/” is important to make folder.

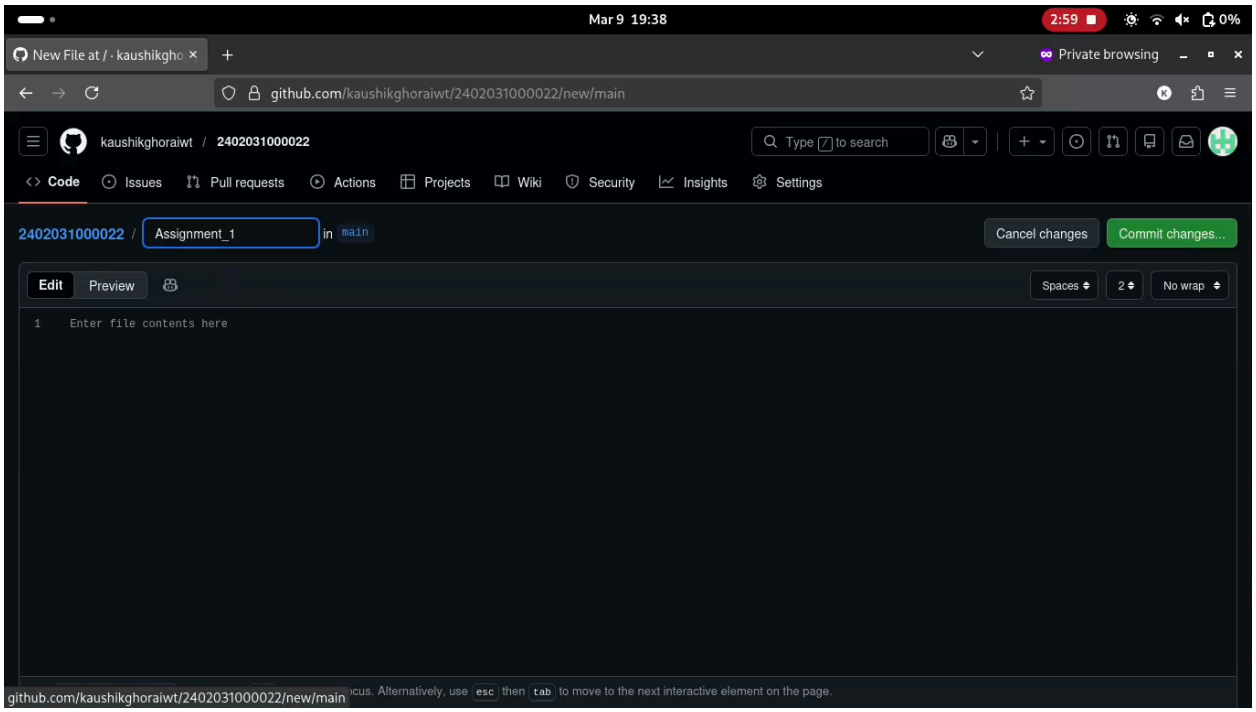


Step 7: Click on Add file > upload files > choose files.



Step 9: Select the necessary files for assignment 1. Wait for the files to upload and then click commit changes at the bottom of the page.





Step 10: Same for the Assignment 2.
